

`glm::acsch`

`glm::asinh`

`glm::asinh`

```
graph LR; A[glm::acsch] --> C[glm::asinh]; B[glm::asinh] --> C;
```

The diagram illustrates a mapping or aliasing relationship. On the left, there are two white rectangular boxes. The top box contains the text `glm::acsch` and the bottom box contains `glm::asinh`. On the right, there is a single gray rectangular box containing the text `glm::asinh`. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both `glm::acsch` and `glm::asinh` are mapped to the same target `glm::asinh`.
