

`glm::acoth`

`glm::atanh`

`glm::atanh`

```
graph LR; A[glm::acoth] --> C[glm::atanh]; B[glm::atanh] --> C;
```

The diagram illustrates a mapping or aliasing relationship. On the left, there are two white rectangular boxes. The top box contains the text `glm::acoth` and the bottom box contains `glm::atanh`. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text `glm::atanh`. This visualizes that both `glm::acoth` and `glm::atanh` are mapped to the same implementation or target, `glm::atanh`.
