

glm::perlin

glm::simplex

glm::detail::permute

```
graph LR; A[glm::perlin] --> C[glm::detail::permute]; B[glm::simplex] --> C;
```

The diagram illustrates a dependency or implementation relationship. Two white rectangular boxes on the left, labeled 'glm::perlin' and 'glm::simplex', have blue arrows pointing from their right sides to a single gray rectangular box on the right labeled 'glm::detail::permute'. This indicates that both 'glm::perlin' and 'glm::simplex' utilize or depend on the 'glm::detail::permute' function.
